303

Description of the task:

Let's play domino with the square set. Play this game in pairs.

Pick one square after each other, and adjust it to the square that has been put down previously. According to the rule, you can adjust the element to another one if it contains a part of the same size and colour. The elements should fit together with their whole sides.

Solution(s) of the task:

Think of your own rules.
